

# Liverpool Canoe Club

## Guidelines for use of Liverpool Marina

There must be a named coordinator who is responsible for safety and locking up at the end of the session.

If you are paddling please add your name to the white board and cross-off at the end.

All groups must be able to perform deepwater rescues safely.

All paddling should be on the Club Calendar.

Pontoons should not be totally blocked with kayaks – please ensure a route through at all times.

Shower curtains should be moved inside of the cubical to reduce the amount of water on changing room floor – Watch for water in wetsuits and booties etc.

More information is on our risk assessment for Liverpool Docks available via the Website.
